

Due: Friday 1/22, 10:00 PM  
Grace period until Friday 1/22, 11:59 PM

## Sundry

Before you start writing your final homework submission, state briefly how you worked on it. Who else did you work with? List names and email addresses. (In case of homework party, you can just describe the group.)

## 1 Administrivia

- (a) Make sure you are on the course Piazza (for Q&A) and Gradescope (for submitting homeworks, including this one). Find and familiarize yourself with the course website. What is its homepage's URL?
- (b) Read the policies page on the course website.
  - (i) What is the percentage breakdown of how your grade is calculated (please include both breakdowns)?
  - (ii) How many discussions do you need to attend to get full credit for discussion attendance?
  - (iii) Can you attend a section different from the one you signed up for?
  - (iv) When are the Vitamins due?

## 2 Course Policies

Go to the course website and read the course policies carefully. Leave a followup in the Homework 0, Question 2 thread on Piazza if you have any questions. Are the following situations violations of course policy? Write "Yes" or "No", and a short explanation for each.

- (a) Alice and Bob work on a problem in a study group. They write up a solution together and submit it, noting on their submissions that they wrote up their homework answers together.
- (b) Carol goes to a homework party and listens to Dan describe his approach to a problem on the board, taking notes in the process. She writes up her homework submission from her notes, crediting Dan.

- (c) Erin comes across a proof that is part of a homework problem while studying course material. She reads it and then, after she has understood it, writes her own solution using the same approach. She submits the homework with a citation to the website.
- (d) Frank is having trouble with his homework and asks Grace for help. Grace lets Frank look at her written solution. Frank copies it onto his notebook and uses the copy to write and submit his homework, crediting Grace.
- (e) Heidi has completed her homework using  $\text{\LaTeX}$ . Her friend Irene has been working on a homework problem for hours, and asks Heidi for help. Heidi sends Irene her PDF solution, and Irene uses it to write her own solution with a citation to Heidi.
- (f) Joe found homework solutions before they were officially released, and every time he got stuck, he looked at the solutions for a hint. He then cited the solutions as part of his submission.

### 3 Use of Piazza

Piazza is incredibly useful for Q&A in such a large-scale class. We will use Piazza for all important announcements. You should check it frequently. We also highly encourage you to use Piazza to ask questions and answer questions from your fellow students.

- (a) Navigate to the "Index" Piazza post, where you can find links to most resources in the course. Write down the Piazza post number for the Note 1 Thread. (When you see  $@x$  on Piazza, where  $x$  is a positive integer, then  $x$  is the post number of the linked post.)
- (b) Read the Piazza Etiquette section of the course policies and explain what is wrong with the following hypothetical student question: "Can someone explain the proof of Theorem XYZ to me?" (Assume Theorem XYZ is a complicated concept.)
- (c) When are the weekly posts released? Are they required reading?

### 4 Discussion Assignment

Please confirm that you have signed up for one of the discussion section at <https://tinyurl.com/cs70-sp21-dis>. What is the name of your GSI and the time of your discussion section?

### 5 Academic Integrity

Please write or type out the following pledge in print, and sign it.

I pledge to uphold the university's honor code: to act with honesty, integrity, and respect for others, including their work. By signing, I ensure that all written homework I submit will be in my own words, that I will acknowledge any collaboration or help received, and that I will neither give nor receive help on any examinations.

## 6 Propositional Practice

In parts (a)-(c), convert the English sentences into propositional logic. In parts (d)-(f), convert the propositions into English. In part (f), let  $P(a)$  represent the proposition that  $a$  is prime.

- (a) There is one and only one real solution to the equation  $x^2 = 0$ .
- (b) Between any two distinct rational numbers, there is another rational number.
- (c) If the square of an integer is greater than 4, that integer is greater than 2 or it is less than -2.
- (d)  $(\forall x \in \mathbb{R}) (x \in \mathbb{C})$
- (e)  $(\forall x, y \in \mathbb{Z})(x^2 - y^2 \neq 10)$
- (f)  $(\forall x \in \mathbb{N}) [ (x > 1) \implies (\exists a, b \in \mathbb{N}) ((a + b = 2x) \wedge P(a) \wedge P(b)) ]$

## 7 Implication

Which of the following assertions are true no matter what proposition  $Q$  represents? For any false assertion, state a counterexample (i.e. come up with a statement  $Q(x, y)$  that would make the implication false). For any true assertion, give a brief explanation for why it is true.

- (a)  $\exists x \exists y Q(x, y) \implies \exists y \exists x Q(x, y)$ .
- (b)  $\forall x \exists y Q(x, y) \implies \exists y \forall x Q(x, y)$ .
- (c)  $\exists x \forall y Q(x, y) \implies \forall y \exists x Q(x, y)$ .
- (d)  $\exists x \exists y Q(x, y) \implies \forall y \exists x Q(x, y)$ .

## 8 Logical Equivalence?

Decide whether each of the following logical equivalence is correct and justify your answer.

- (a)  $\forall x (P(x) \wedge Q(x)) \equiv \forall x P(x) \wedge \forall x Q(x)$
- (b)  $\forall x (P(x) \vee Q(x)) \equiv \forall x P(x) \vee \forall x Q(x)$
- (c)  $\exists x (P(x) \vee Q(x)) \equiv \exists x P(x) \vee \exists x Q(x)$
- (d)  $\exists x (P(x) \wedge Q(x)) \equiv \exists x P(x) \wedge \exists x Q(x)$
